

## Enterprise Hosted Solutions - Previsor

### Project Summary:

**CPS** is an on-line "command center" equipped with an integrated suite of role based capabilities to plan for, respond to, and recover from any incident or event.

Originally developed at the Department of Energy's Oak Ridge National Laboratories, CPS provides a comprehensive operational backbone that strengthens mission capabilities within the NIMS/ICS/EOC framework.

"Safety Act Designated", CPS integrates capabilities-based planning, training, HSEEP compliant exercise, and resource forecasting tools needed to assess and achieve target capability performance levels. CPS was developed recognizing the importance of the National Preparedness Guidelines' vision for, "A Nation Prepared with coordinated capabilities to prevent, protect against, respond to, and recover from all hazards in a way that balances risk with resources and need."

**CEMPlanner™** - Comprehensive Emergency Management Planner

CEMPlanner creates a structured planning environment that accommodates the competing demands of a busy schedule while developing industry-compliant plans on schedule.

**MCH Corporation hosts these products in its hosting center.**
